

Quick Online Shop Documentation

In the following tutorial, you will get a complete step by step guide of using **Quick Online Shop WordPress theme** for building an amazon affiliate store site. All steps have been briefly explained out so that you don't stuck anywhere while setting up things for website.

Introduction of Quick Online Shop WordPress Theme

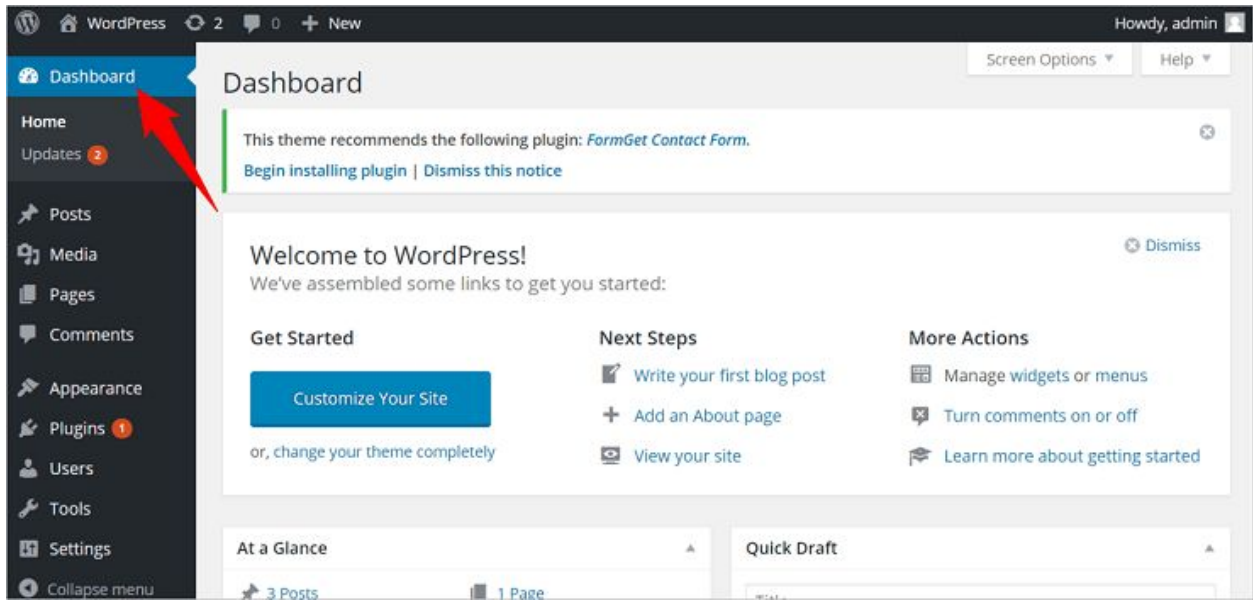

Quick Online Shop is a powerful WordPress theme that allow you to quickly create fully featured Amazon affiliate store within an hour. The theme is integrated with Affiliate plugin and Woocommerce plugin. Since the theme is integrated with Woocommerce plugin you can also create ecommerce website with this theme.

The theme import all the selected item that you want to promote on autopilot. Just tap from 250+ millions of products and your site is ready.

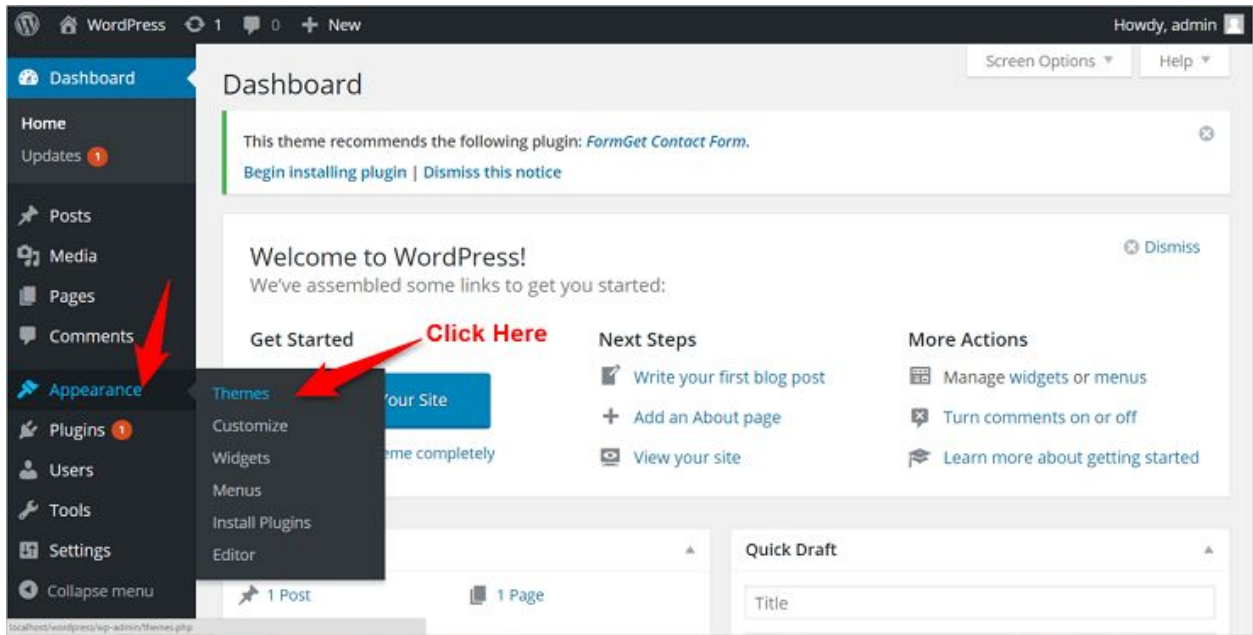

How to Install Quick Online Shop Theme

Before moving forward just make sure WordPress is installed on your webserver. Now download the theme from your members area.

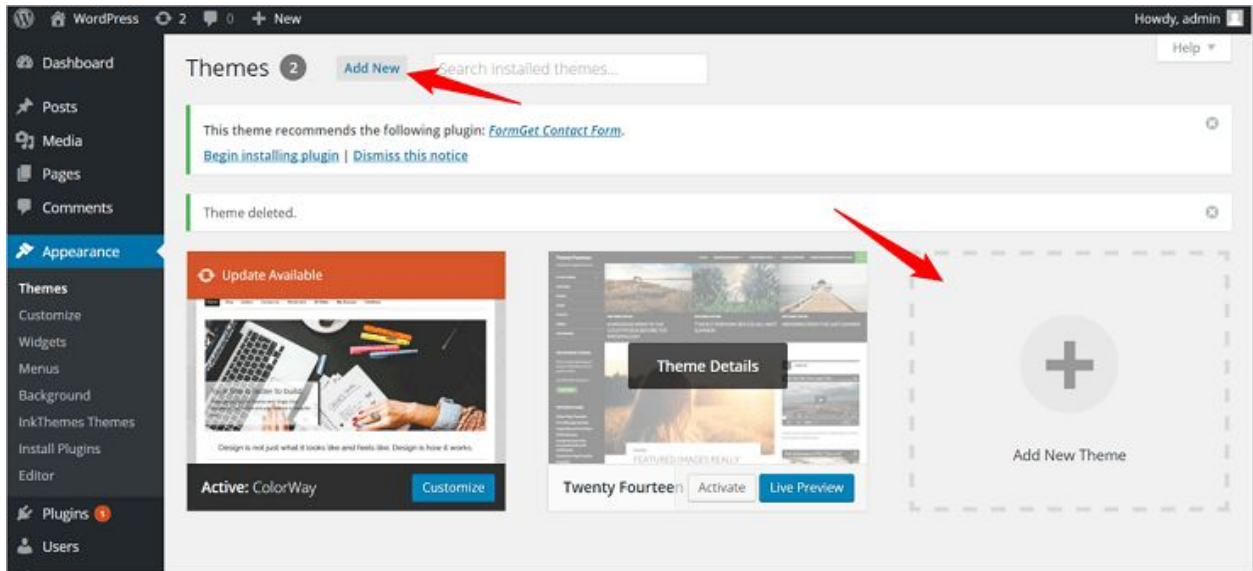

STEP#1 – Go to WordPress dashboard

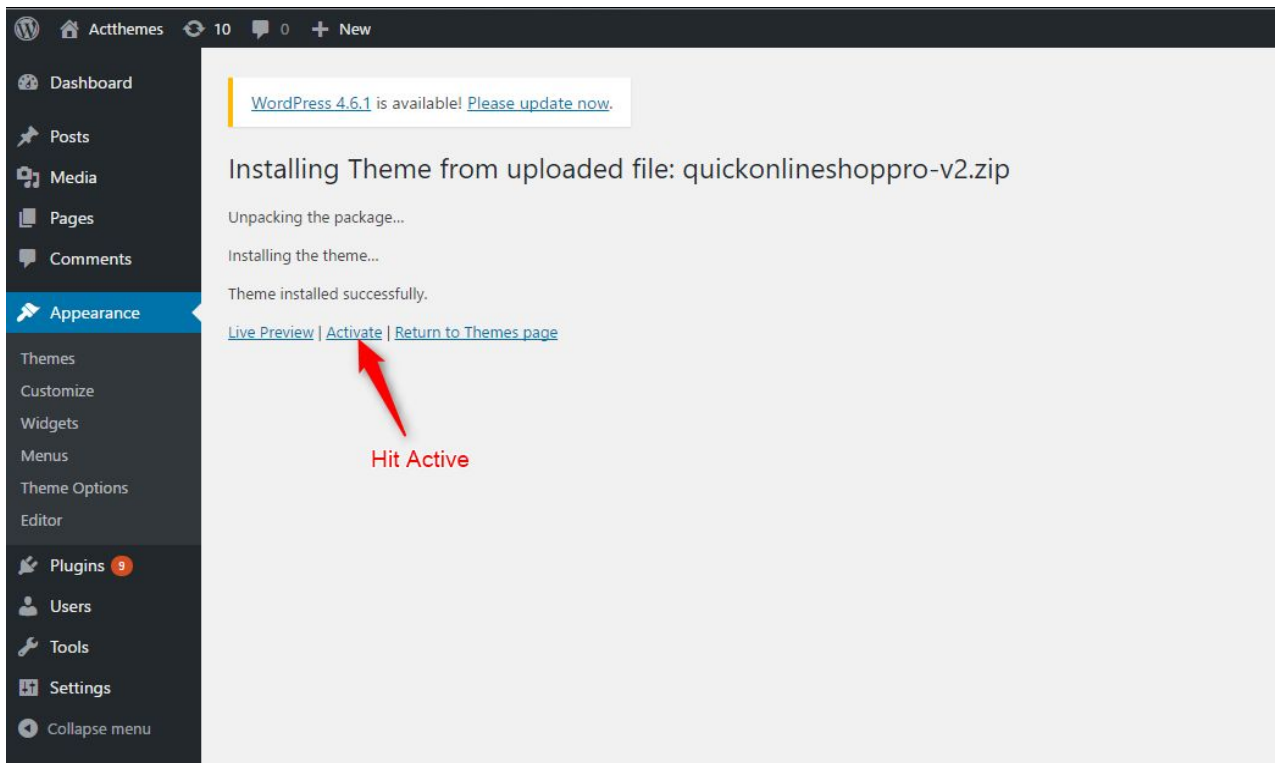

STEP#2 – Going onto Appearance tab, a new sidebar will appear. Then, Click on Themes tab and you will be redirected to the theme managing section.

STEP#3 – Then click on “Add New” option upload the quick online shop theme zip file, which you’ve downloaded. Then click on “Install Now”.

STEP#4 – Once the theme installed successfully, click on the “Activate” button and you’re all ready with your new website layout.

STEP#5 – Now this theme need 2 plugins to work properly i.e. Woocommerce plugin and Affiliate Shop plugin . Hence a notice will appear at the top of the dashboard. Click on **“begin installing plugin”**.

The screenshot shows the WordPress Themes page. At the top, there is a notice: "This theme requires the following plugin: *Affiliateshop*. The following required plugin is currently inactive: *WooCommerce*. [Begin installing plugin](#) | [Dismiss this notice](#)". A red arrow points to the "Begin installing plugin" link with the text "Click Here". Below the notice are three theme preview cards. The first card is for "Quick Online Shop Pro V2" and has a red arrow pointing to its "Customize" button with the text "Quick Online Shop Theme". The other two cards are for "ColorWay Pro Responsive Theme" and "One Page Pro".

Now Install and Activate both the plugin.

The screenshot shows the "Install Required Plugins" screen. At the top, it says "All (2) | To Activate (2)". Below this is a "Bulk Actions" dropdown menu with an "Apply" button. A red arrow points to the "Apply" button with the text "Select both the plugin and perform bulck action - Install and Activate". Below the menu is a table with the following data:

<input checked="" type="checkbox"/>	Plugin	Source	Type	Version	Status
<input checked="" type="checkbox"/>	Affiliateshop Activate	Pre-Packaged	Required	Installed version:	1.0 Installed But Not Activated
<input checked="" type="checkbox"/>	WooCommerce Activate	WordPress Repository	Required	Installed version:	2.6.4 Installed But Not Activated
<input checked="" type="checkbox"/>	Plugin	Source	Type	Version	Status

At the bottom, there is another "Bulk Actions" dropdown menu with an "Apply" button. The text "TGMPA v2.6.1" is visible in the bottom right corner.

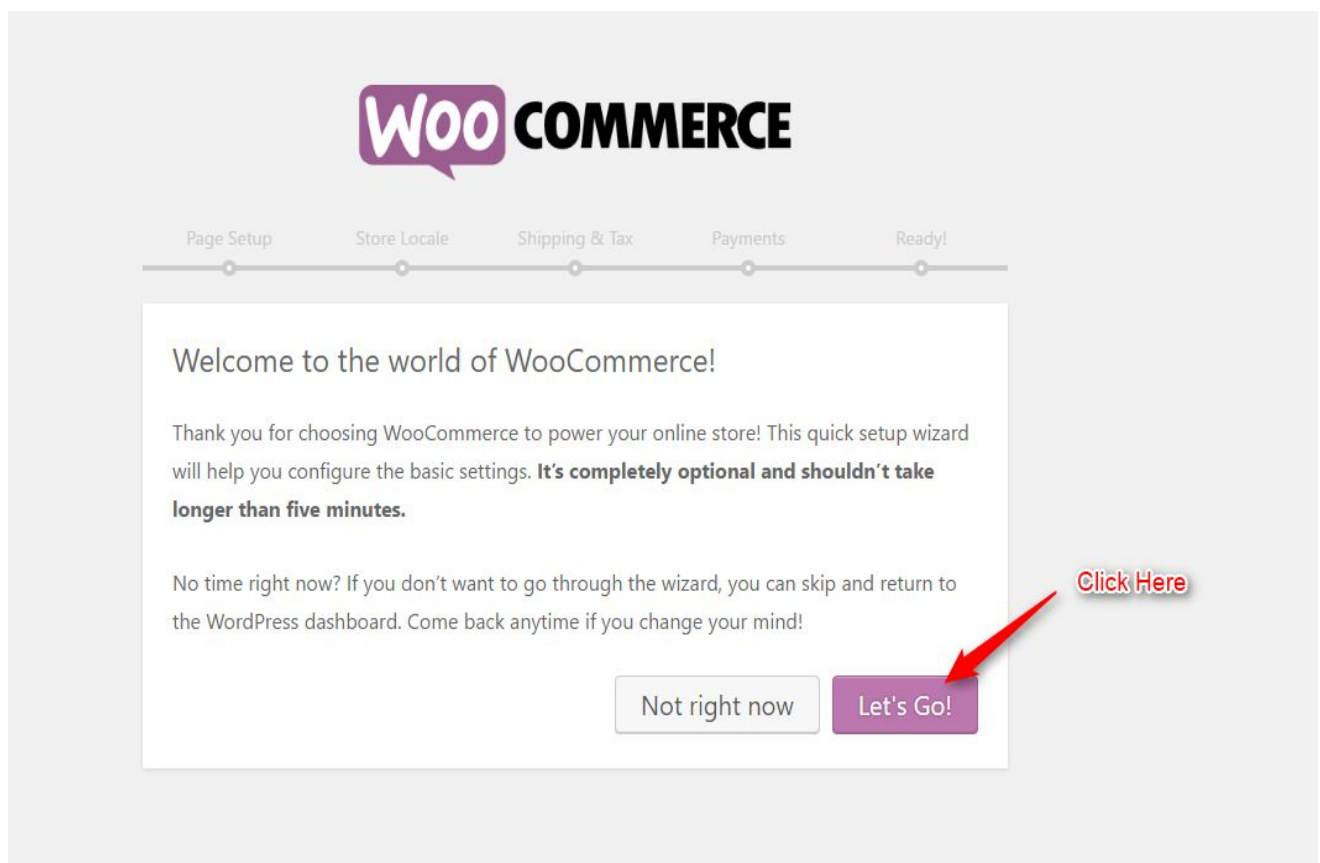

Now after completion of Installation process move towards setup process.

WooCommerce Setup Wizard

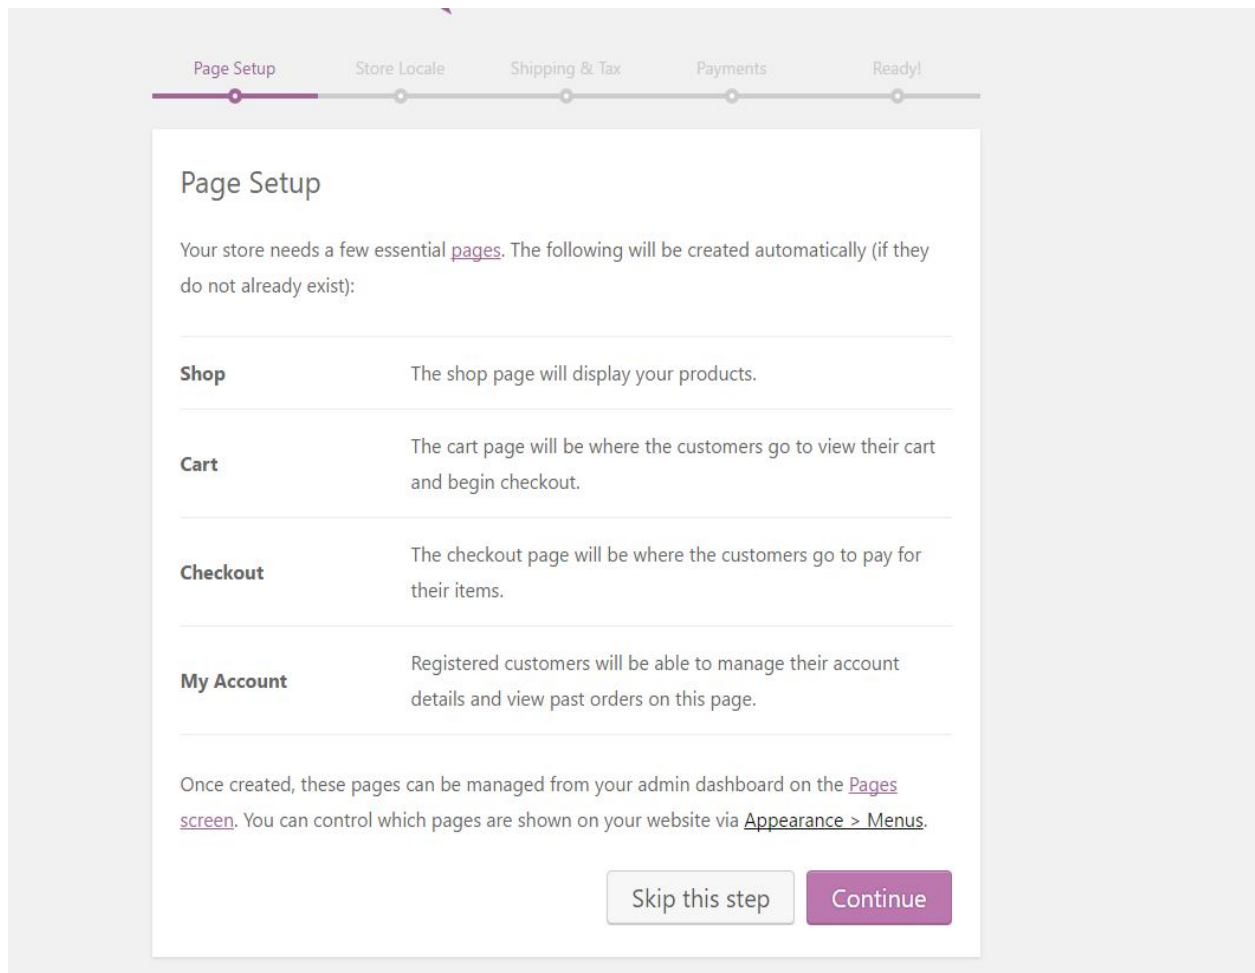

As soon as you activate the plugin you will see a welcome message with a button “Run the Setup Wizard”. Click that button.

You will navigate to Woocommerce welcome window, and at the bottom you will find button “Let’s Go” click that.

Which will take you to page setup window, click “Continue”. This will automatically create Shop, Account, Cart and Checkout page.

Moving forward you will find Store Locale setup - here you have to select the country where you store is based and the currency. And also choose the applicable unit and dimension for your products. Once you're done hit “Continue” button at the bottom.

Page Setup Store Locale Shipping & Tax Payments Ready!

Store Locale Setup

Where is your store based? **Select your country**

Which currency will your store use? **Your Currency**
If your currency is not listed you can [add it later](#).

Currency Position **Set you currency position**

Thousand Separator

Decimal Separator

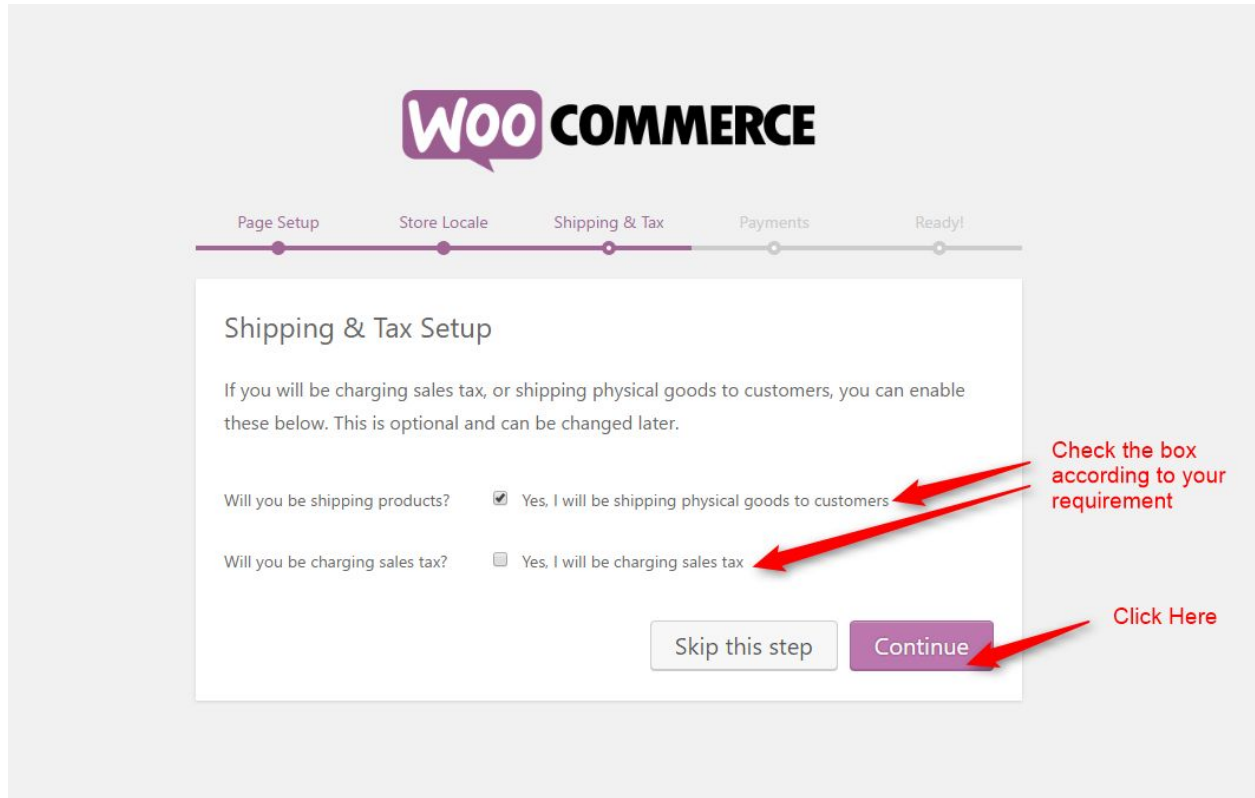

Number of Decimals

Which unit should be used for product weights? **Choose the unit and dimension that you want to use for your product**

Which unit should be used for product dimensions?

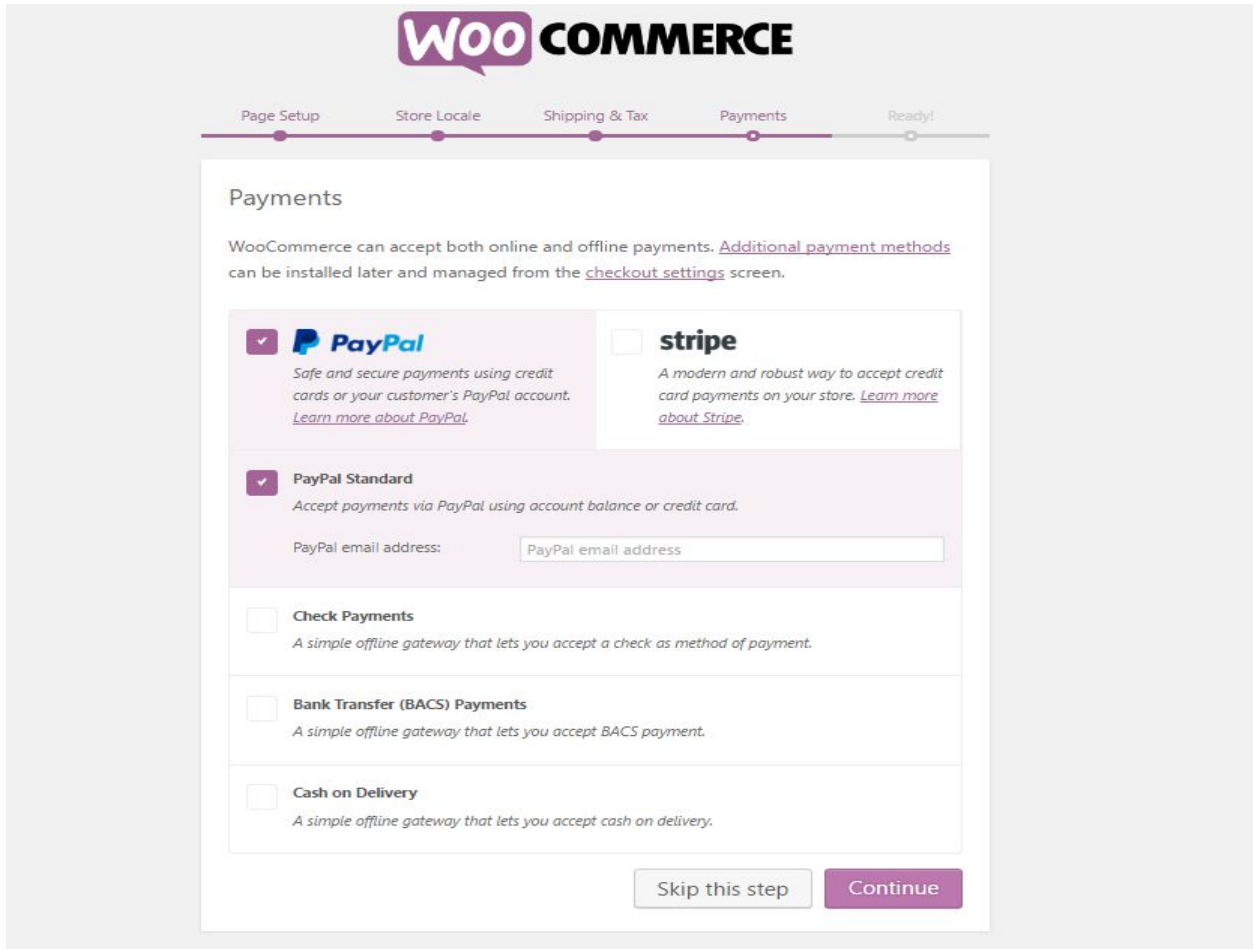

Now you will be redirected to Shipping and Tax setup page here you can select the option according to your requirement. If you will charging sales and shipping physical products you can check both.

This is optional and can be changed later. Plus this option is applicable if you wish to sell your own items along with amazon products. Now click "Continue" and move forward.

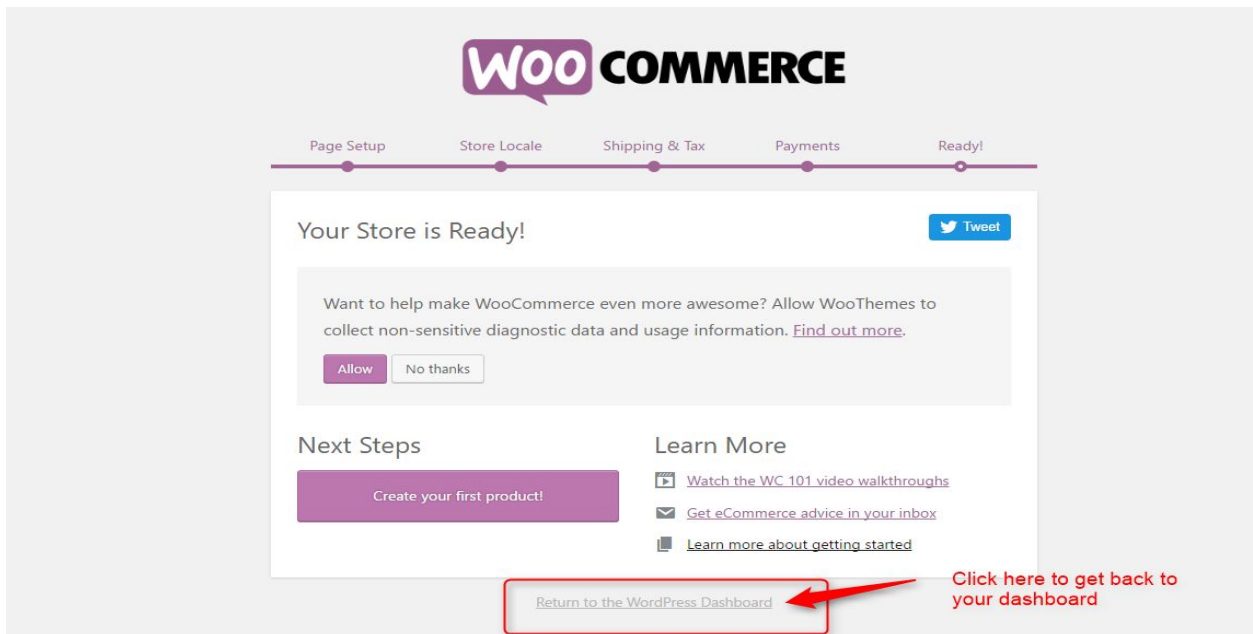

Now coming to Payments page here you can select multiple payment mode that you want to offer your customer. Woocommerce can accept online and offline payment both. Just enter the required information and click Continue.

Again this option is useful if you sell your own items from your website. And if you want to create affiliate store only you can skip this setup.

Now you're done, just click on Return to the WordPress Dashboard.

Amazon Account Setup

Now to move forward and to setup your store we need 3 things secret key, access key and your affiliate id. You need these three things before plugin will display Amazon products.

Now follow the following steps to get those three things.

Step#1 Getting your affiliate id

Sign up for your Amazon Affiliate/Partner account at one of the following URLs (choose the correct link based on your Amazon location):

Brazil (com.br): <http://associados.amazon.com.br/gp/associates/apply/main.html>

Canada (ca): <http://associates.amazon.ca/gp/associates/apply/main.html>

China (cn): <http://associates.amazon.cn/gp/associates/apply/main.html>

France (fr): <http://partenaires.amazon.fr/gp/associates/apply/main.html>

Germany (de): <http://partnernet.amazon.de/gp/associates/apply/main.html>

India (in): <http://affiliate-program.amazon.in/gp/associates/apply/main.html>

Italy (it): <http://programma-affiliazione.amazon.it/gp/associates/apply/main.html>

Japan (jp): <http://affiliate.amazon.co.jp/gp/associates/apply/main.html>

Spain (es): <http://afiliados.amazon.es/gp/associates/apply/main.html>

United Kingdom (co.uk):

<http://affiliate-program.amazon.co.uk/gp/associates/apply/main.html>

United States (com): <http://affiliate-program.amazon.com/gp/associates/apply/main.html>

Amazon requires that you have a different affiliate ID for each country (aka, locale).

Step 2 - Getting your API Keys

Amazon requires ALL API users to have a different, secure set of keys to make API calls. Because of this, we cannot add any keys to the plug-in for you. You must sign up for your own set and put the into the plug-in options fields on the config page by yourself.

Start by creating a new user account. if you have an Amazon account set up from the previous step of getting your Affiliate ID, you can login using that information and skip to step 2e).

Step#2a - Sign In

Amazon.com Product Advertising API License Agreement

Last updated on 2012-11-21. (Current Associates: [See what's changed.](#))

This Amazon.com Product Advertising API License Agreement ("License Agreement") contains the terms and conditions that govern your access to and use of the Product Advertising API, Data Feed, and Product Advertising Content (each as defined below). "We," "us," or "our" means Amazon Services LLC or any of its affiliate companies, as the case may be. "You" or "your" means the applicant. A "site" means a website. "Amazon Site" means the relevant U.S. site that is owned or operated by us or our affiliates for which we may make available Product Advertising Content pursuant to this License Agreement. "Your application" means any software...

Check here to indicate that you have read and agree to the terms and conditions of the Product Advertising API License Agreement. ←

Security Check

By typing the characters you see into the box, you help Amazon prevent automated or scripted form submissions. This enables us to prevent fraud and abuse so that we may continue to ensure a high quality of service to all customers.

About Amazon.com Sign In

Amazon Web Services uses information from your Amazon.com account to identify you and allow access to Amazon Web Services. Your use of this site is governed by our [Terms of Use](#) and [Privacy Policy](#) linked below.

[Terms of Use](#) | [Privacy Policy](#) © 1996-2013, Amazon.com, Inc. or its affiliates

An **amazon.com** company

Step#2g - This will take you to the Security Credentials Page. Note that if you have Keys for other AWS products, you may have to select the Product Advertising API from the list to access that page.

Also - note that this management page WILL change in the near future to the new Amazon IAM Management Console. They provide a link to the new console but eventually you will need to access it from their IAM services login.

Scroll down the page to the Access Keys section and note the Amazon Access Key ID (sometimes referred to as Public Key). That is what you will put in the Amazon Access Key ID, so keep the link with you.

The screenshot shows the AWS Management Console interface. At the top, there is the Amazon Web Services logo, a 'Sign Up' button, and links for 'My Account / Console' and 'English'. Below this is a search bar and navigation links for 'AWS Products & Solutions', 'AWS Product Information', 'Developers', and 'Support'. The main content area is titled 'Welcome Don Fischer New | Sign Out' with the account number '2417-6663-3061'. A yellow notification box states: 'Note: Please use the new page named Your Security Credentials in the AWS Management Console to manage security credentials. AWS will support the current page for a limited time to help during your transition.' Below this, another yellow box says: 'This page allows you to manage the root account credentials for your AWS Account. To manage IAM Users, their permissions, and security credentials, use the AWS Management Console.' The main text explains that access to AWS services is secure and requires special credentials. It lists three types: Access Credentials (Access Keys, X.509 Certificates, Key Pairs), Sign-In Credentials (E-mail Address, Password, MFA), and Account Identifiers (AWS Account ID, Canonical User ID). A link 'Find out which AWS Security Credentials you need' is provided. The 'Access Credentials' section follows, explaining the three types. A tabbed interface shows 'Access Keys' selected. Text explains that access keys are used for REST or Query protocol requests. A table titled 'Your Access Keys' is shown with columns: Created, Access Key ID, Secret Access Key, and Status. The first row shows a key created on June 11, 2013, with ID '3OUWBUDG2C3OUWBUA'. The 'Secret Access Key' column contains a 'Show' link, which is highlighted with a red arrow. Below the table is a link 'Create a new Access Key' and a warning about not sharing secret keys. A 'Learn more about Access Keys' link is also present. The 'Sign-In Credentials' section follows, explaining the requirements for signing in to AWS services, specifically mentioning the Amazon E-mail Address and Password.

Welcome Don Fischer New | Sign Out
Account Number 2417-6663-3061

Note: Please use the new page named Your Security Credentials in the AWS Management Console to manage security credentials. AWS will support the current page for a limited time to help during your transition.

This page allows you to manage the root account credentials for your AWS Account. To manage IAM Users, their permissions, and security credentials, use the AWS Management Console.

Access to applications and services within AWS cloud is secure and protected in multiple ways. Accessing those applications and services requires the use of special credentials that are associated with your account. There are three types of credentials currently offered by AWS. If you know which security credentials you need, simply select one of the links below:

- ↓ **Access Credentials:** Your Access Keys, X.509 Certificates, and Key Pairs
- ↓ **Sign-In Credentials:** Your E-mail Address, Password, and AWS Multi-Factor Authentication Device
- ↓ **Account Identifiers:** Your AWS Account ID and Canonical User ID

If you are not sure which security credentials you should use, the link below will help you identify the credentials you need for the task you want to accomplish:

Find out which AWS Security Credentials you need

Access Credentials

There are three types of access credentials used to authenticate your requests to AWS services: (a) access keys, (b) X.509 certificates, and (c) key pairs. Each access credential type is explained below.

Access Keys | X.509 Certificates | Key Pairs

Use access keys to make secure REST or Query protocol requests to any AWS service API. We create one for you when your account is created — see your access key below.

Your Access Keys

Created	Access Key ID	Secret Access Key	Status
June 11, 2013	3OUWBUDG2C3OUWBUA	Show	Active (Make Inactive)

Create a new Access Key

For your protection, you should never share your secret access keys with anyone. In addition, industry best practice recommends frequent key rotation.

Learn more about Access Keys

Sign-In Credentials

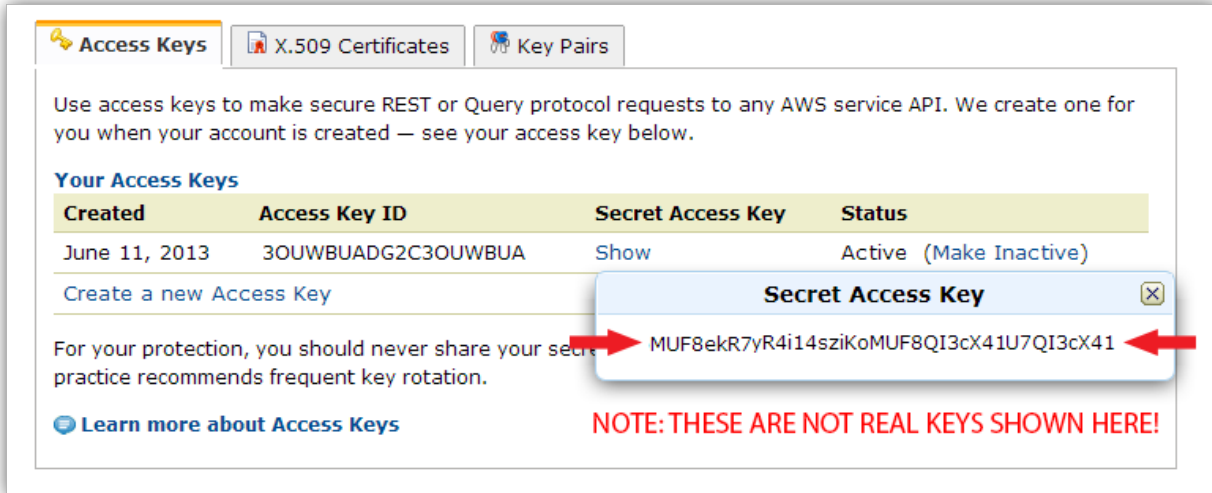

To sign in to AWS web sites and applications, AWS requires your Amazon e-mail address and password. Additionally, it supports the AWS Multi-Factor Authentication option. Each sign-in credential is explained below.

Amazon E-mail Address and Password

To sign in to secure pages on the AWS web site, the AWS Management Console, the AWS Discussion Forums, and the AWS Premium Support site, you need to provide your Amazon e-mail address and password.

Click SHOW to see the Secret Access Key (sometimes referred to as Secret Key).

Step#2h- In the Secret Access Key box that shows, copy the key and keep it with you.

The screenshot shows the AWS IAM console's 'Access Keys' page. At the top, there are tabs for 'Access Keys', 'X.509 Certificates', and 'Key Pairs'. Below the tabs, there is a brief explanation of access keys. A table titled 'Your Access Keys' lists one key created on June 11, 2013, with the Access Key ID '3OUWBUDG2C3OUWBUA' and status 'Active'. A 'Show' button is next to the key ID. A 'Secret Access Key' popup window is open, displaying the key 'MUF8ekR7yR4i14szikoMUF8QI3cX41U7QI3cX41'. Red arrows point from the 'Show' button to the popup and from the popup to the key text. A red note at the bottom right of the screenshot reads 'NOTE: THESE ARE NOT REAL KEYS SHOWN HERE!'.

Created	Access Key ID	Secret Access Key	Status
June 11, 2013	3OUWBUDG2C3OUWBUA	Show	Active (Make Inactive)

Secret Access Key MUF8ekR7yR4i14szikoMUF8QI3cX41U7QI3cX41

NOTE: THESE ARE NOT REAL KEYS SHOWN HERE!

Step#2i - MISC Information

IF YOU DO use the new Amazon IAM Management Console, your Access Key ID will be located under the "Your Security Credentials" page. They will NOT show you your Secret Access Key here any longer. If you lose it, you MUST generate a new Root Key.

After you generate the Root Key, it will serve the browser with a csv file that has both the Access Key ID and the Secret Access Key inside. In the very near future, they will not provide the Secret Key over the web page, you WILL have to download it if you generate the keys.

Your Security Credentials

Use this page to manage the credentials for your AWS account. To manage credentials for AWS Identity and Access Management (IAM) users, use the [IAM Console](#).

To learn more about the types of AWS credentials and how they're used, see [AWS Security Credentials](#) in AWS General Reference.

+ Password

+ Multi-Factor Authentication (MFA)

- Access Keys

Note: You can have a maximum of two access keys (active or inactive) at a time.

Created	Deleted	Access Key ID	Status	Actions
Jun 10th 2013		AKIAJAPJBDG2C3OUWBUA	Active	Make Inactive Delete

[Create New Root Key](#)

Note: If you must retrieve existing secret access keys, use the legacy [Security Credentials](#) page and save your keys in a safe place. AWS will support the legacy Security Credentials page for a limited time to help during your transition.

+ CloudFront Key Pairs

+ X.509 Certificates

by

Well you have all the three things with you, now move to your WordPress dashboard. On your left side of menu panel you will find the option AffiliateShop.

Goto AffiliateShop and click that. You'll redirected to plugin dashboard.

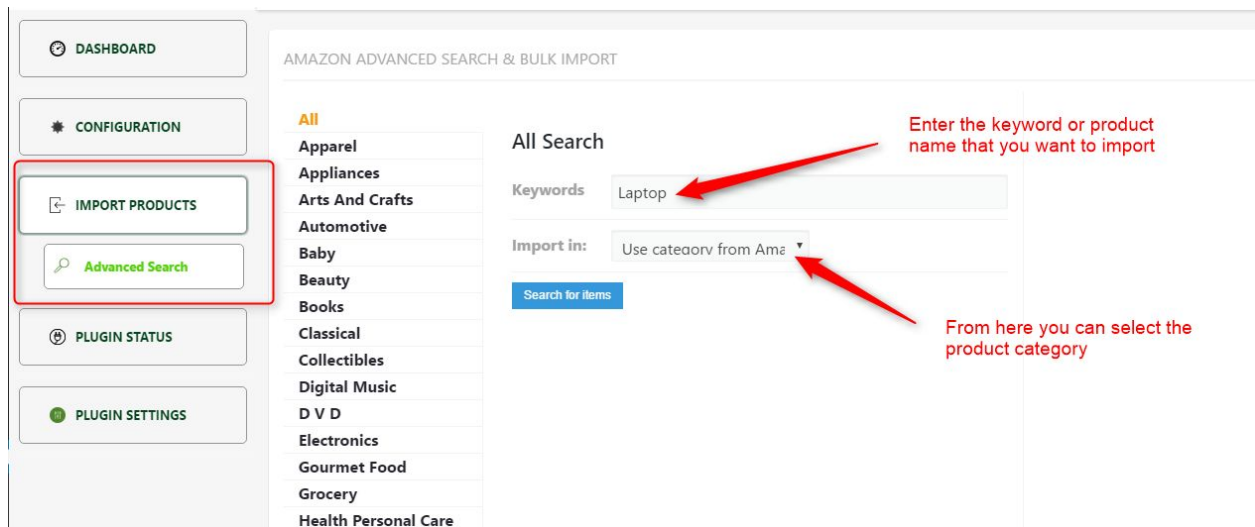

Now goto Configuration >> Amazon Config and here insert your keys and affiliate id. Once you entered all the details click "Check Amazon AWS Keys".

If everything was setup properly you will receive a success message like shown below in the image. Click Ok.

Now move to Import Products >> Advanced Search.

Enter the keyword or the name of item you want to promote and hit "Search for Item"

Now the list of items will appear on the right side. You can uncheck the box for the product you don't want to include and hit Import Products

Execution Queue:

Import product(s)

Showing 1 - 230838 of 2308372 Results (The limit from Amazon is 5 pages for your page: 1)

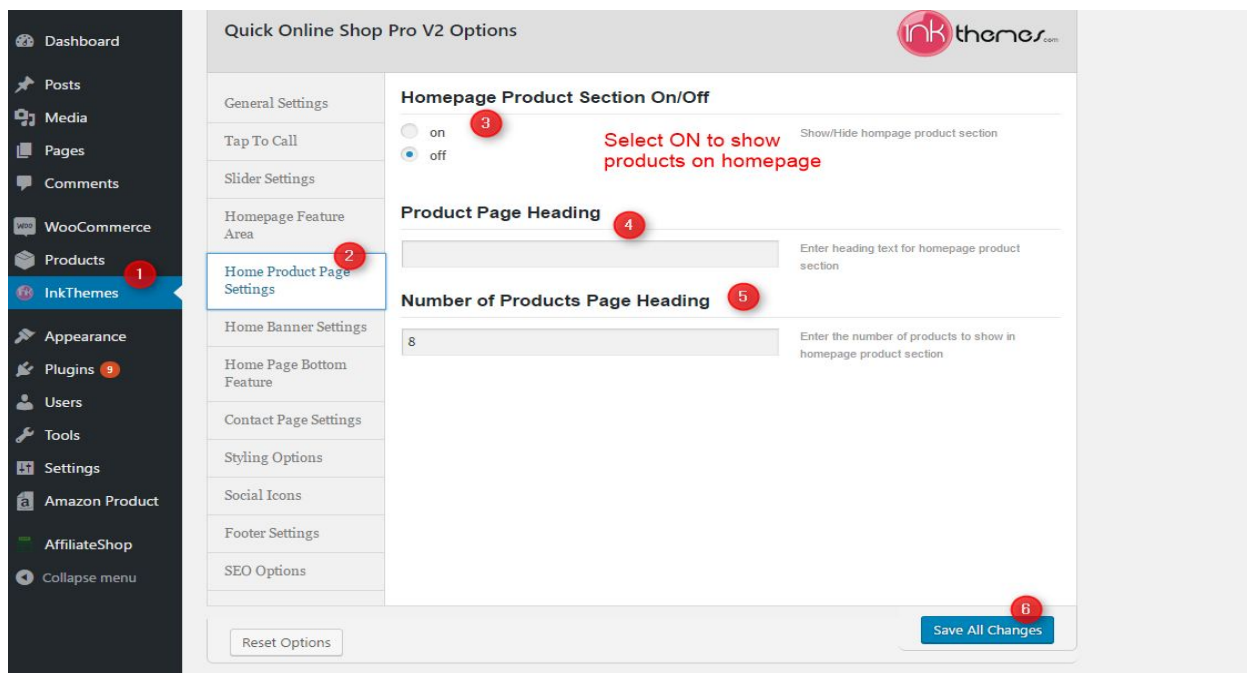

<input checked="" type="checkbox"/>	Product name	Image	Price	View
<input checked="" type="checkbox"/>	Acer Aspire E 15, 15.6 Full HD, Intel Core i5, NVIDIA 940MX, 8GB DDR4, 256GB SSD, Windows 10, E5-575G-53VG		\$549.99	View details
<input checked="" type="checkbox"/>	HP Notebook 15-ay011nr 15.6-Inch Laptop (6th Gen Intel Core i5-6200U Processor, 8GB DDR3L SDRAM, 1TB HDD, Windows 10), Silver		\$459.99	View details
<input checked="" type="checkbox"/>	Acer Chromebook CB3-131-C3SZ 11.6-Inch Laptop (Intel Celeron N2840 Dual-Core Processor, 2 GB RAM, 16 GB Solid State		\$173.55	View details

Now just wait for a while, the system will import all the images and description. And if you purchased the theme Review Engine it will import product reviews as well.

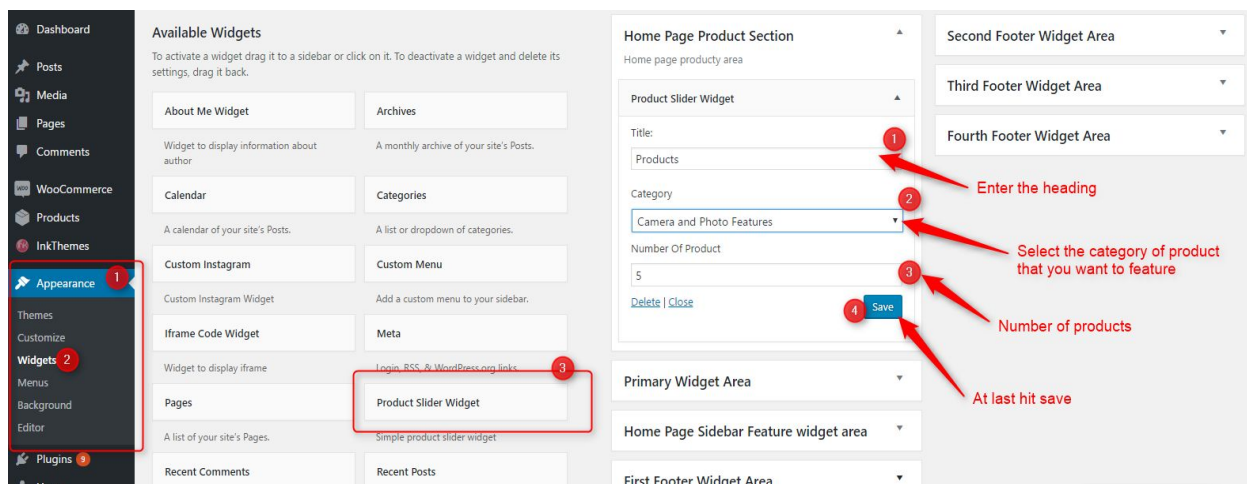

You can insert different different keywords and import the products just like the way we did above.

Now you have to move to your dashboard again.

Goto InkThemes option from the left side of menu Quick Online Shop option page will appear. Move to Home Product Page Settings. Select ON under Homepage Product Section, enter suitable heading and then the number of post you want to display on homepage. This section will showcase the recent added product on homepage.

And if you want to display products on homepage according to category you can do that as well. For that move to Appearance >> widgets, there you will find Product Slider Widget. Drag it and drop it on Home Page Product Section widget area. Enter the proper title, choose the category that you want to display and the number of products. Hit save button.

Now move to your site refresh it. This is how product will appear on homepage. First 2 rows is the list of recent product coming from theme dashboard panel.

The second section will show the products according to selected category.

Note You can drag and drop multiple widget and different category to showcase multiple unique products on homepage.

Recent Products

 £949.00 £869.99 View Details	 £899.00 £749.99 View Details	 £559.00 £439.99 View Details	 £549.99 View Details

--	--	---	---

Now moving further let's setup the homepage of your website.

Goto dashboard-> Inkthemes, you will navigate to Theme Option Panel.

Now under "General Settings" you can set your own logo, favicon and background image. You can paste Google analytic or any other analytic code to track your website and then Save all the Changes.

The screenshot displays the 'Quick Online Shop Pro V2 Options' panel within a WordPress dashboard. On the left, a dark sidebar menu lists various site management options, with 'InkThemes' highlighted in blue and enclosed in a red rectangular box. The main content area is titled 'Quick Online Shop Pro V2 Options' and features the 'ink themes.com' logo in the top right corner. A vertical list of settings categories is on the left, with 'General Settings' selected. The main panel is divided into several sections:

- Homepage Loading Animation:** Includes radio buttons for 'on' (selected) and 'off', with a note: 'Homepage loading animation on/off'.
- Custom Logo:** Features an image upload field with the instruction 'Upload a logo for your Website.' and 'Upload Image' and 'Remove' buttons.
- Custom Favicon:** Features an image upload field with the instruction 'Here you can upload a Favicon for your Website. Specified size is 16px x 16px.' and 'Upload Image' and 'Remove' buttons.
- Background Image:** Features an image upload field with the instruction 'Choose a suitable background image that will complement your website.' and 'Upload Image' and 'Remove' buttons.
- Tracking Code:** Includes a large text area for pasting code, with the instruction 'Paste your Google Analytics (or other) tracking code here.'

At the bottom of the panel, there are two buttons: 'Reset Options' and 'Save All Changes'.

Now coming down Tap to Call feature here you can enter your contact number and setup the button color. This button will appear on mobile, ipad or tablet view.

Slider Settings

In the slider, you can show maximum of 6 images whereas minimum would be one. With each slider image you can set the heading and short description according to you.

Moreover, you can also give a link for slider images and its text.

Note: The optimal size for slider image is 1600px wide * 825px height.

You can activate slider on the home page just by click on Upload Image button and upload the images which you want to show in the slider.

Moreover, you can also set the slider speed (in milliseconds) according to you.

For e.g. if you want to set the slider speed as 5 seconds then enter 5000.

Quick Online Shop Pro V2 Options

Blog Page And Posts

Now let's create a separate page that shows all your blog posts in one go. To do so just follow the below mention steps...

- Go to Pages > Add New
- Enter the name of the page
- Now at right hand side under Page Attributes > Templates > select “Blog Page”
- Click “Publish” button

Menu Setup

By default, the menus will fallback to Pages. That means just after activation of the theme, you will see all the pages as menus. Create a custom Menu and assign a menu location to display your own Menu. If you want selective menus with combination of links, pages, categories then custom menu is what you should be looking for.

Set up Custom Menu

- Go to Appearance > Menus in the WordPress menu
- Click on Create a new menu link
- Now add the menu item, you can choose Pages, Custom links, Category etc.
- Check Theme Location
- Click Save Menu after adding required custom links in the menu
- Theme Location for Menu settings

Main Menu - Display the menu on the Header.

Footer Menu - Displays the menu on bottom right at the footer.

The screenshot shows the WordPress 'Menus' editor interface. On the left sidebar, the 'Appearance' menu is highlighted with a red box, and the 'Menus' sub-menu is selected with a red arrow. The main content area is titled 'Select a menu to edit: Main Menu (Main Menu)'. A red circle '1' points to the 'or create a new menu.' link. Below this, the 'Pages' section is expanded, showing a list of pages with checkboxes. A red circle '3' points to the 'Pages' dropdown. The 'Menu Structure' section contains a list of menu items: 'Home' (Custom Link), 'Shop' (Page), 'Electronics sub item' (Product Category), 'Laptops sub item' (Product Category), 'My Account' (Page), 'Cart sub item' (Page), and 'Checkout sub item' (Page). A red circle '4' points to the 'Menu Structure' header. A red arrow points from the 'Electronics sub item' to the right, with the text: 'Drag and drop each item to arrange it in order. And to create drop down menu drag it towards right side and drop it'. The 'Save Menu' button is in the top right corner, with a red circle '6' pointing to it. The 'Menu Settings' section at the bottom has a red circle '5' pointing to its header. It includes options for 'Auto add pages' and 'Theme locations', with 'Main Menu' selected under 'Theme locations'.

Thanks for purchasing the Quick Online Shop theme. If you have any questions that are beyond the scope of this documentation, you can freely ask it on our support forum.
